Good afternoon Ali, Karen

Further to your recent meeting with Agnico's permitting group that sought clarification on the submission of the 60-day notices for construction, I wanted to reach out and provide you with a summary of the 60-day notices that Hope Bay anticipates submitting this coming year. Note that some of these may not go ahead or may require further discussions. I've added expected timelines for some of the submissions. I would be happy to discuss these with you both at your convenience.

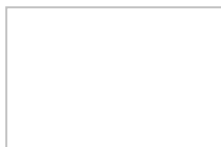

List of 60 day notices at Doris/Madrid included in the 2022 workplan

- Madrid Contact Water Pond sump (March 2022)
- Wind Turbine Constructions - this may be only the pads this year (May 2022)
- Construction of additional water treatment plant on existing reagent pad (July 2022)
- Construction of toe berm at the South dam as per Annual Geotechnical Inspection recommendation (Fall 2022)
- Construction of Cemented Rockfill Plant (to be added in the Management Plan)
- Installation of Gensets and associated fuel tanks & secondary containment at Madrid
- Expansion of pad for exploration activities

Other activities relating to Water Management at the TIA but not finalized or require further discussion.

- Construction of Spillway
- Construction of sumps to capture runoff inside the TIA footprint

Warmest regards

Nancy Duquet Harvey Environmental Superintendent
