**Re: Hackett River Project Type A Water Licence Application**

---

Please find enclosed Sabina Silver Corporation's application for a Type A Water Licence for the Hackett River Project, which is located in the West Kitikmeot Region of Nunavut. Sabina Silver is a publicly listed Canadian company whose principle development asset is the Hackett River Project, but which also has exploration interests in the Stewart-Eskay Creek district as well as the Red Lake Gold Camp.

Included with our application is a Project Proposal, which is meant to fulfil the Nunavut Impact Review Board's (NIRB) Screening Part 2 Form, Project Specific Information Requirements (PSIR). All forms required by NIRB are included in the Project Proposal as appendices.

We have also included our application to Indian and Northern Affairs Canada (INAC) for the use of crown land.

The specific contents of this package include the following:

- Water Licence Application Form
- Application Fee of \$30.00
- Water Use Fee of \$30.00
- Copy of the application for Crown Land access
- One hardcopy of the Hackett River Project Proposal Report in English
- One electronic copy of the Hackett River Project Proposal Report in English
- GIS-compatible digital files of maps as specified in NIRB's Screening Part 2 Form

- Completed NIRB Part 1 Forms in English, Inuktitut, and Inuinnaqtun (Appendix A of Project Proposal)
- Completed NIRB Part 2 Form: Project Specific Information Requirements in English (Appendix A of Project Proposal)
- Non-Technical Project Description in English, Inuktitut, and Inuinnaqtun (Appendix A of Project Proposal)

We are pleased to provide you with this information, which will start the water licence and environmental assessment process. We look forward to working with the Nunavut Water Board, NIRB, the residents of the Kitikmeot Region, regulators, and interested interveners to advance the Hackett River Project through the environmental assessment process and subsequent water board process.

Yours truly,

SABINA SILVER CORPORATION
