**Re: Class A Land Use Application for Sabina Gold & Silver Back River Project  
Exploration Activities**

Dear Brian,

Please find enclosed Sabina Gold & Silver Corp.'s application for a new land use permit for the mineral exploration activities on the Back River properties in the Beechy Lake area. This permit would replace the current N2006C0008 that will be closed at the end of this year.

Sabina sees an opportunity to continue exploration activities in the Back River area and is requesting a new land use permit for mineral exploration and associated resupply activities for a period of two years (starting November 1, 2010).

This request for land use permit is submitted with one hardcopy and one electronic copy of:

- Project Summary in Inuinnaqtun, Inuktitut and English;
- Location Map
- INAC land use application form;
- Spill Contingency Plan for Goose Lake camp and George Lake camp;
- Abandonment and Restoration Plan for Goose Lake camp and George Lake camp;
- Application and Land use fees;
- NIRB Part 1 Form "Project Proposal Information Requirements"; and
- NIRB Screening Part 2 Form "Project Specific Information Requirements".

Please note that the exploration activities under the current land use permit for Back River was screened by NIRB (file 08EA84) and includes Goose Lake, George Lake, Boulder, Boot and Del Lake properties. This application includes similar exploration activities. Additions to the current application and not screened in 2008 include:

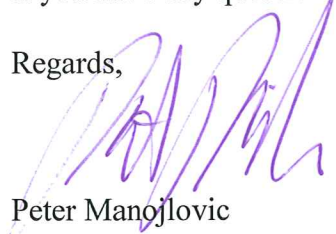

- Temporary camps established on an "as-needed" basis to support exploration and resupply activities
- Storage of fuel and chemicals for exploration activities at locations other than Goose Lake Camp

These components have been added because the property area to be explored may require nearby support for safety, environmental and economic reasons.

If you have any questions regarding this application please call me at (604) 998-4175.

Regards,

Peter Manojlovic  
Chief Geologist
