RE: Receipt of Tahera Diamond Corporation Addendum Document

Dear Parties,

The Nunavut Water Board (NWB) acknowledges receipt of the above-cited document submitted by the Tahera Diamond Corporation (Tahera) in relation to their water licence application.

In its letter of September 25, 2004, the NWB determined that Tahera's application *generally* conformed to the guidelines, and that it would proceed to a public hearing on December 6 and 7, 2004. In the same letter, and as part of its conformity review, the NWB identified a number of subject-matters that were unclear or that did not conform to the guidelines, and requested that Tahera provide an addendum clarifying those topics by today's date. In accordance with the NWB's request, Tahera has submitted the addendum for your continued review prior to the Technical Meeting and Pre-hearing in Kugluktuk on October 28 and 29, 2004. The document is available through the following link to the NWB's ftp site:

<http://ftp.nunavut.ca/nwb/NWB1%20MINING/NWB1JERD/> then select the Addendum Document.

Should you have any questions please do not hesitate to contact myself or Philippe di Pizzo.

Sincerely,

Original signed by
