Date	<b>1 November 2004</b>		
Subject	<b>Bathymetry of Lake C3</b>		

---

Dave,

As requested at the 28 October 2004 Jericho Diamond Project workshop in Kugluktuk, I have attached a copy of the bathymetry of Lake C3 produced from surveys conducted by RL&L in 2001. We are not proposing to move SNP5 as the mixing zone is dynamic and a fixed point will not be guaranteed to be at the edge of the mixing zone.

Please contact me if you have any questions.
