Hello NWB,

I wanted to give a quick update of the Jericho Mine Site. Tahera Diamond Corporation is no longer running the site. It is being administered by an Agent for INAC. I am continuing with the environmental work on site and will be maintaining all the requirements of the water license to the best of my ability for the near future. This is my new email address and my phone number is below. Feel free to contact me with any questions that you might have. Talk to you soon

Merry Christmas
