

ENVIRONMENTAL PROGRAM SUMMARY

Initial environmental studies are being considered for the subject claim area. Studies envisaged will include collection of water quality samples up to three times during the summer period (June through September), establishment of stream gauging stations and measurement of stream flows, spot vegetation surveys of the claim area to verify aerial vegetation mapping, and fisheries surveys in local lakes. Fisheries surveys would be by non-destructive methods (catch and release).

Wildlife studies at Muskox are being conducted as part of the wildlife monitoring requirements for the Jericho Diamond Mine under separate permit.
