Subject: Detection Limits for Copper Influencing Carat Lake Average Concentration for Copper

Dave,

Re. your query about the above:

The only sample collection where copper detection limit wasn't 0.0001 mg/L was April 96 where the detection limit was 0.01 mg/L. These data were not used in determining ranges and averages for copper for Carat Lake in the Final EIS water quality report.

Memo

To **Dave Osmond**

From **Bruce Ott**

Tel

Fax

Date **1 November 2004**

Subject **Bathymetry of Lake C3**

File No. **VE51295**

cc **Tahera Diamond Corporation
Nunavut Water Board**

Dave,

As requested at the 28 October 2004 Jericho Diamond Project workshop in Kugluktuk, I have attached a copy of the bathymetry of Lake C3 produced from surveys conducted by RL&L in 2001. We are not proposing to move SNP5 as the mixing zone is dynamic and a fixed point will not be guaranteed to be at the edge of the mixing zone.

Please contact me if you have any questions.
