---

Hi Phyllis,

My apologies for not responding to this request sooner. Unfortunately, I was on vacation when your email came in and since the deadline was buried in an attachment, our EA staff in our Yellowknife office missed this one.

As per your request, I have reviewed Shear's responses to our comments related to this water license renewal. To that end, EC does not have any issues that would preclude this license proceeding to the Hearing phase.

By way of this message, I would also like to clarify that as per item 88 (a-b), EC would like to see these chronic tests added as a condition to Shear's Type A water license.

Please let me know if an email is an appropriate medium to confirm the above. I thought it would be more expeditious to respond via email so that you could have a response today. If you require something more formal for the public record, I can provide you a signed letter that conveys the same tomorrow.

Best,

**Allison Dunn**

**Subject:** 2AM-JER0410 Response to June 22 letter to Parties  
**Importance:** High

Good morning everyone....The Nunavut Water Board provided the attached letter to all Parties on June 22, 2011. Within that letter all parties, including those parties who were not in attendance at the TM/PHC, were to confirm by June 29, 2011 that they are satisfied that the responses provided by the proponent adequately address their concerns and questions raised during the technical review and that there are no issues that would preclude the NWB from proceeding to a Hearing on this matter. Please provide a response for our records, thank you.

Regards,

Phyllis Beaulieu  
Manager of Licensing  
Nunavut Water Board
