RE: SNP Minewater Quality Monitoring Report  
Water Licence N7L2-1666  
Jericho Diamond Project

RECEIVED  
DEC 01 1997

Dear Ms. Filiatrault

Please accept this letter as our monthly water quality report for November 1997, as required under Part C, Item 1 of the Surveillance Network Program (SNP), annexed to Water Licence N7L2-1666.

The SNP requires that effluent at the established stations be sampled during periods of minewater discharge. However, on-site representatives report that no minewater was discharged during the month of November. It is therefore our understanding that no sampling is required at this time. We will continue to monitor the situation and issue monthly reports as the bulk sampling program progresses.

If you have any questions or comments, please contact the undersigned at (604) 984-7200.

Yours truly,

CANAMERA GEOLOGICAL LTD.

Jasen M. Attow
