Subject: AREVA-Kiggavik Project Proposal-Nov. 2008

Good afternoon;

Please find attached the interpretation of the 'Transportation Corridor / Access Road' provisions of the Keewatin Regional Land Use Plan (KRLUP). The purpose of this interpretation is to give clear guidance to the implementation of the terms listed while conducting a conformity determination process for potential project proposals that may include the development of a access road or a transportation and /or communications corridor.

The NPC is now also in receipt of a Package submitted by AREVA titled "The Kiggavik Project-Project Proposal (binder-cd). It is to NPC's understanding that the permitting agencies to which are receiving this email notification received the same proposal. To ensure that this is the case, the NPC will not initiate the conformity determination until we receive a copy of the respective permitting agency's application and it's project description submitted by the proponent. A faxed copy or a PDFed version will be sufficient, fax number is listed below

Please do not hesitate to call me at 867.857.2242 if you have any questions or concerns.

Thank you,

Brian
