Every area of that land will be hit and destroyed then lead on to Baker and on down to the southern communities, so the impact could be dangerous for the whole Kivalliq region.

If a spill occurs like in France, which became contaminated in to the river, then to Baker Lake, into our drinking water. Tailings will be blown away for hundreds of kilometers destroying wildlife and their habitat, as well as fish habitat. Human health issues is also a big concern, Aircon will take the good stuff and leave the bad stuff; tailings on Inuit land for our future generations of Inuit will be left with no animals, bad water and destroyed land.

Do you have any suggestions or recommendations for this application?

Politicians at the local and regional level should educate Inuit on the good and bad effects of uranium mining before making decision for us; which they already have.
