 the new mining route. foxes, wolves are fed by
 the southerner, there fore they tend to go to the camps for
 the enjoyment of the southerner to get that "wild wolf/fox" picture perfect shot!

Approval of this uranium mine will lead to unlimited uranium mining in our hunting areas. The safety... security of the tailings & their possible impact on our food chain. Spring run-offs contaminates would spread.

Do you support the project proposal? Yes ☐ No ☒ to our water-system + surrounding lakes

Please describe the concerns indicated above: Inuit are not informed of plans. They are not seeking input from the residents of Baker Lake. Inuit organizations and Hamlets are in approval of these developments without checking with those whom they represent. Uranium mining will hurt Inuit in so many ways. The community is downwind and down-stream. The exploration phase is already driving away the caribou herds and further development will make this worse. The mine will do irreversible damage to our land, air and water and animals which will in turn affect our health. The community is being bombarded with exploration and development and N.I.R.B. is supposed to look out for the interests of the Inuit of Nunavut.

I recommend that Nunavut Impact Review Board deny development of the Areva proposal in the Baker Lake Area. Uranium mining is NOT safe. Areva had a spill in France last year.
