ECCC TC4 – Hivituniga Amiriinaqniaqinagata Pivikhaqaqnigalu

Partly Resolved / Ilainaa Ihuaqhiyuq

ECCC recommends that:

- The proponent includes thresholds for water quality and tailings cover performance that would trigger moving to reduced monitoring frequency or intensity in the proposed post-closure monitoring plan.
- Monitoring of the tailings containment area (TCA) cover and water quality be done over a duration that is sufficient to demonstrate physical and chemical stability and acceptable quality for the long term.
