Hi Dave and Sean,

As previously discussed, Lupin Mines Incorporated is requesting to have our water licence (2AM-LUP1520) modified to remove the requirement of monitoring wells at the approved Landfarm.

Attached is a letter from Norwest Corporation (signed and stamped by the engineer) providing their professional opinion on monitoring wells for the Lupin Mine landfarm.

As previously discussed, Lupin Mines sent the Inspector a copy of the draft letter from Norwest. The Inspector provided her comments to LMI and Norwest provided a revised version taking into account the Inspectors comments.

The Inspector advised via email that "I am not an engineer and cannot confirm or refute your engineer's determination that the leak detection system is superior to monitoring wells. I have never seen one and I don't know how they perform in the North. If the engineer is confident in the technology, then I don't see why the board would not support your request. "

Please let me know if you require any further information or have any questions.

Thanks and I hope you both have an enjoyable long weekend.

Regards,

Karyn Lewis
Lupin Mines Incorporated
