Hi NWB,

We are currently reviewing the security reduction request/Progressive reclamation.

So I have a question regarding the closure plan.

Has the closure plan been submitted by LMI and is it going to be distributed for review, because in order to do an adequate review on the current documents the closure plan is needed. If the closure plan is available then we would need an extended timeframe to review. If not, our submission to date will be asking for some documentation.

Also doesn't a reduction in security require an amendment process? Please confirm

Thanks,

Ian

Hi Ian,

Actually we did receive FCRP, however, the NWB was advised that LMI intends to update it with the HHERA and include it within the the renewal application package that could be with NPC currently.

You are right that the security reduction will require an amendment to licence. This was the reason on why NWB did ask and LMI provided a Schedule for anticipated progressive work and respective reductions from now until the issuance of potential renewal licence in 12-18 months from now. This schedule will be processed within this request, and if parties agree with this approach the NWB decision could discuss this schedule to avoid having another request for amendment in near future.
