Dear Ms. Beaulieu

RE: Monthly Report for April 2013
Lupin Mine, Nunavut, License Number 2AM-LUP0914

Activities on site during the month of April involved care and maintenance only. There were 293 person days for the month of April, with up to 15 people on site. Accommodation arrangements remain unchanged from that of March. For business reasons, Lupin Mines Inc. (LMI) made a decision to temporarily return the mine site back to Care and Maintenance (un-occupied status) on April 24, 2013. LMI put all facilities back in proper care and maintenance consistent with the conditions outlined in the permits, licences, and leases. All regulatory agencies were notified by telephone and followed up by written documentation of this temporary change in status. LMI will continue to make periodic site visits and perform monitoring and inspections of all facilities. The site visits will increase during the spring freshet to ensure the site is maintained appropriately.

Domestic water use for the month was estimated to be 96,688 L (96.7 m³), drawn from Contwoyto Lake. Approximately 91,853 L (91.9 m³) of sewage was produced and discharged to the upper sewage lake.

Domestic waste generated during the month of April was incinerated on-site each day. There were 5 mega bags of miscellaneous solid waste (plastics, ceiling tiles, debris, etc from office restorations), and 1 mega bag of recyclable beverage containers that were sent to an approved facility in Yellowknife, NT for recycling and/or disposal.

If you have any questions regarding the above, please do not hesitate to contact me.

Sincerely,
Lupin Mines Incorporated.

for 
Wayne Osborne
