Re: Inquiry for NPC File #148681 Agnico Eagle Mines Meadowbank Modification - In-Pit Tailings Disposal

The project is located in the Kivalliq Region at Meadowbank Mine and activities include a proposed modification of Agnico Eagle's tailings disposal from the current method (discharge in the Meadowbank Tailings Storage Facility within the former Second Portage Lake northwest dewatered arm, where tailings have been deposited sub-aerially as slurry and water) to an in-pit tailings disposal in three abandoned open pit sites.
