Re: NIRB File No. 03MN107: Government of Canada Final Written Submissions regarding Agnico Eagle Mines Limited's, In-Pit Tailing Disposal Modification Project Proposal.

Dear Mr. Barry,

On behalf of the Government of Canada, we are informing you of a necessary clarification as it relates to our cover letter sent to you on August 1, 2018.

We indicate in our letter the following statement; "Departments of Health and Natural Resources have reviewed the information and have confirmed no comments at this time." However, in reviewing this, we acknowledge this is a clerical error on the part of the Northern Projects Management Office (NPMO) and confirms that this was meant to read as follows; "Departments of Health and Transport Canada have reviewed the information and have confirmed no comments at this time."

NPMO confirms that Transport Canada has no comments and is satisfied with the information provided. On August 3, 2018, NPMO submitted the Final Written Submission on behalf of the Natural Resources and we believe that the submission provides significant expertise in the areas of permafrost and hydrology.

We appreciate your consideration of this error and look forward to participating in further stages of the review of this proposed project.

Sincerely,

Manik Duggar
A/Director General
Northern Projects Management Office

CC: David Rochette, Regional Director General, Crown Indigenous Relations and Northern Affairs Canada
Dale Nicholson, Regional Director General, Fisheries and Oceans Canada, Central and Arctic Region
Mary Taylor, Director General, Environment Stewardship Branch, Environment Canada
Shari Currie, Regional Director General, Prairie and Northern Region Transport Canada
