Subject: FW: Use of evidence from the Meadowbank Public Hearing in support of Type B applications

Hi Phyllis,
The email address in the letter is spelled incorrectly, maybe let people know.
Thanks,
Anne

Subject: Use of evidence from the Meadowbank Public Hearing in support of Type B applications

Good afternoon Phyllis,

Further to Dionne's letter of May 20th regarding Agnico-Eagle Mines Ltd.'s Type B application, EC understands that the Board is seeking the views of all parties on the best means of addressing information gaps identified in the Type B application. The Board has determined that the information is available in the public record for the Type A application, and one option is for the Board to refer to and use this information. The other option would be for AEM to respond directly to the comments on the Type B application submitted by the parties.

As the Board has already ascertained the location and extend of information contained on the public record, it would be most efficient to proceed to use it directly. In order for the parties to also access the information relevant to the concerns flagged (and for completeness of the public record), it would be useful to have a list of what was referenced by the Board. This would also help confirm that further detail was not required from AEM.

Regards,
Anne
