Re: Water License 2AM-MEA1526 - Submission of Revised Incinerator Waste Management Plan and Landfill and Design Management Plan

Mr. Kharatyan, Mr. Dwyer,

Agnico Eagle Mines Limited, Meadowbank Division is proposing to include composting in the on-site operations for the purpose of optimizing waste management by reducing the amount of waste going to the incinerator and thus reducing fuel consumption at the Meadowbank Mine site.

In accordance with Part B Item 13 of Water Licence 2AM-MEA1526, please find enclosed with this letter the following management plans revised:

- Incinerator Waste Management Plan. Addition of Appendix III: Composter Management Plan. The plan has also been revised to include proposed changes in the operation of the incinerator (i.e. reduction in amount of waste incinerated).
- Landfill and Design Management Plan. This plan has been revised to include proposed changes in the operation of the landfill (i.e. addition of composter output as approved material to be landfilled).

Agnico Eagle is planning to start operating the composter during fall 2018 once the above plans are approved by the Nunavut Water Board.

Should you have any questions regarding this submission, do not hesitate to contact me.

Regards,

Agnico Eagle Mines Limited
