Ryan VanEngen (Environment), Jenny and Lorraine Niego (HR) hosted a trip and tour of the mine site (logistics were organized primarily by HR).

Ryan provided an introduction to the mine site and presented information by power point about the methods of mining, pit infrastructure, general milling process and energy used for mining. This was followed by a site tour that explained and showed the students the crushers, mill, powerhouse, waste management (incinerator and hazardous waste), sewage treatment, bulk storage onsite, pit, water treatment and tailings facilities.
