Hi Steve

We anticipated sending the Waste management plan before October 30.

Thanks

Hi Stéphane:

Richard forwarded your email updating the status of the Waste Management Plan and I appreciate the update. As you know, when AEM submitted the Water Management Plan the NWB then informed parties on August 18, 2009, that its distribution and review was on hold pending receipt of the Waste Management Plan. As some time has passed since the NWB's last letter, the NWB would like to provide an update to the distribution list on the status of the Waste Management Plan and its anticipated arrival. In that regard, it would be most helpful if you could provide a timeframe for submission of the Waste Management Plan. I'm drafting a letter today so I'm hoping you can get back to me shortly with a proposed date. Much thanks.

Hi Richard

We are in the process of revising our tailing deposition plan and our final mining plan. These two components are very important in our Waste management plan.

If we give you the plan like it is, it will be not valid in one month. We want to have a waste management who will be representative for the next years.

These two components are in the process of been completed and will be integrated in the Waste management plan. We will send you the final waste management plan as soon as these two important components are finalize.

If you have any questions or comments do not hesitate to contact me.

Thank you for your comprehension

Regards

Stéphane Robert

Hi Steve

We have last change to do on the Waste management plan this week. We will send the report by mid-September via our fta and a CD will be send.

If you have more questions do not hesitate to contact me.

Bonjour Stephane,
Richard Dwyer had sent me the cover letter that accompanied the submission of the Water Management Plan, which is dated July 29, 2009. It indicates that the other half of the plan, the Waste Management Plan, will be submitted separately at a later date pending final review. Could you provide an approximate timeframe for its submission so that I can inform the consultant who will be looking at the file? I imagine it will be sent on CD as well which will require more time.
Merci.
