SUBJECT: KIA response to comments on Operational Notice of the Development of a Site-Specific Water Quality Objective for Total Dissolved Solids

 $^{5}bL\sigma^{5}O^{5}b$ 

**Baker Lake** 

Dear Mr. Dwyer,

closure process.

Sincerely,

 $\Delta^{L}$   $\rightarrow$   $C^{1}$ 

Chesterfield Inlet

The KIA has reviewed the Response to Comments on the Operational Notice of the Development of Site-Specific Water Quality Objectives for Total Dissolved Solids, and has the following comment:

As part of their initial submission and subsequent response to intervenor comments, Agnico Eagle has

indicated they will provide further information on the water quality in the Goose Pit and Pit E, such as

assimilative capacity of the receiving environment, species sensitivity distributions for TDS, and updates

to the models used to forecast pit water quality. It is the KIAs view that this information can be used to inform further discussion about the requirement for and development of an SSQWG for TDS during the
