ξ3[ξ5 Arviat SUBJECT: KIA response to comments on Operational Notice of the Development

of a Site-Specific Water Quality Objective for Total Dissolved Solids

χμι5γξ6

Baker Lake Dear Mr. Dwyer,

 $\omega = \lambda o Z 3 9 4$

Chesterfield Inlet

The KIA has reviewed the Second Response to Comments on the Operational Notice of the Development of Site-Specific Water Quality Objectives for Total Dissolved Solids, and has the following comment:

v906

Coral Harbour The KIA thanks the proponent for providing the requested documentation in the second response to intervenor comments. While the KIA understands the basis for the development of the 1000 mg/L Site Specific Water Quality Objective for the receiving environment, the KIA would prefer a guideline more informed by the baseline TDS concentrations, with the use of mitigation measures where possible.
