

August 10, 2014

The following is in follow up to the Reportable Spill which occurred August 10, 2014 at the Meadowbank Gold Project:

- All contaminants from this spill were excavated and removed by equipment or were captured by absorbent pads.
- Excavated materials were hauled to the Meadowbank Landfarm at the Meadowbank Gold Project.
- Absorbents were collected and removed. These absorbents were taken to the Meadowbank Hazardous waste storage area and will be sent south for proper disposal with our annual Hazardous waste shipment.

If you have any other questions please feel free to contact me.

Thank you,

Jeff
