Good Morning,

I am pleased to inform you that the following spills are recommended for closure as of Jan 22nd, 2018.

2015-478	2016-117	2016-383	2017-447
2015-485	2016-120	2016-432	
2015-502	2016-150	2017-029	
2015-504	2016-162	2017-042	
2015-507	2016-168	2017-081	
2015-511	2016-174	2017-104	
2016-025	2016-183	2017-210	
2016-027	2016-219	2017-233	
2016-034	2016-235	2017-274	
2016-098	2016-354	2017-288	
2016-106	2016-357	2017-380	
2016-107	2016-383	2017-383	
2016-108	2016-432	2017-400	

These closure recommendations are based on a combination of INAC's onsite inspections and follow up reports submitted by Agnico Eagle Gold Mines Ltd, Environment Department.

It should be noted that a number of the actually spill locations are modified since the occurrence or plainly do not exist, making the INAC inspection quite onerous. An example are spills that occur in the pit, with the changes to the pit over the course of regular mining the area is difficult to delineate with the frequency of INAC inspections. A form of desktop inspection is being developed to ensure proper reclamation. The Environment Department implements the Meadowbank Spill Contingency Plan as required, and records the details which are then provided to the Inspector for a final review.

If you have any questions or concerns regarding the information above please feel free to contact me directly.

Regards,

Christine Wilson, EP
