Phyllis Beaulieu,

We are pleased to submit this review of Agnico Eagle Mine's "Application for Type 'A' Water Licence, Meliadine Gold Project" on behalf of the Kivalliq Inuit Association under the direction of their Director of Lands, Mr. Luis Manzo, while he is away on vacation. Should you have any questions in his absence, please do not hesitate to contact me. He will return in early January should you require anything further at that time.

Please note that this submission does not include the required Inuktitut translation of the executive summary. We will provide that to the Nunavut Water Board in a separate submission.

All the best and happy holidays,

Richard
