**Table 2 - 2020 Meliadine Wildlife Incident Details**

Observation Date	Incident Details
Friday, February 07, 2020	A dead arctic hare was found on the road near Saline Pond 1 and the RO Plant by the night shift and reported to the Environment Department the morning of February 7 <sup>th</sup> , 2020. This situation was reported to the GN the morning of February 7 <sup>th</sup> and with GN permission the arctic hare was incinerated.
June 3, 9 and 10, 2020	4 Snow Geese mortalities occurred in June 2020 (2 on June 3 <sup>rd</sup> , June 9 <sup>th</sup> and June 10 <sup>th</sup> ) which were reported to the GN. A marten or fox was the suspected cause.
Tuesday, August 25, 2020*	On August 25 <sup>th</sup> , 2020 a song bird flew in the maintenance shop when trucks were switching for repair, the bird flew and hit the ceiling fan, the situation was reported to the GN.
Sunday, September 20, 2020	On September 20, 2020 a dead ptarmigan on a road leading to A8 during the monthly dustfalls jars pickup. Due to his location, it was assumed the bird was hit by a vehicle, the event was reported to the GN.
Wednesday, December 23, 2020	In December 2020, one wildlife incident occurred. December 23 <sup>rd</sup> , 2020, the E&I Operations supervisor received a call from a haul truck operator who had just noticed what he thought to be a dead Fox on the haul road near the paste plant. The Environment Department visited the site right away and found the animal which turned out to be a large Arctic Hare. The incident seemed quite fresh, so it was likely that it was haul truck which struck it unknowingly and noticed it as he was driving back. The operator reported the incident right away. Conditions were very dark at the time, and from a large haul truck turning a corner, the Hare would not have been visible. The Hare was bagged and brought to the incinerator for disposal and GN Wildlife Officers were notified.
