Subject: Re: Water Management Working Group Update and Next Meeting

Thank you Anne. This is a reasonable request.

Agnico Eagle has committed to provide the test results later today, so in order for the WMWG members to have enough time to review the data, the NWB is proposing to postpone the teleconference until **Wednesday, August 26, 2020**.

Could the WMWG members please confirm if this new time works for them or they have any other commitments?

Good morning everybody,

This is a reminder that our next Water Management Working Group (WMWG) teleconference is scheduled for **Monday, August 24, 2020**.

Agnico Eagle will send all available test results and other associated materials, as well as the call-in information (tentatively for Monday afternoon), in a direct reply to this email thread.

Please note that the NIRB is having their information session in Rankin Inlet on Monday as well (see the attached poster).

Could the WMWG members please confirm that they do not have conflict with the timing?

Thank you,

Good afternoon everyone,

Agnico Eagle has informed the NWB that they experienced some sampling delays due to poor weather conditions (see the attached email).

They are proposing to hold the next WMWG teleconference **on Monday, August 24, 2020**. They are committing to send the updated physico-chemical data, updated water quality and toxicity test results and the presentation materials prior to this meeting.

Could the parties please confirm their availability on the stated date by replying to this group email?

Subject: Water Management Working Group Update and Next Meeting

To: Richard Dwyer <richard.dwyer@nwb-oen.ca>

Cc: Sergey Kuflevskiy <sergey.kuflevskiy@nwb-oen.ca>, Michel Groleau <michel.groleau@agnicoeagle.com>, Melissa Bradley <melissa.bradley@agnicoeagle.com>, Meliadine Environment Supervisors <meli.environment.supervisors@agnicoeagle.com>

Good afternoon Mr. Dwyer,

This message is to update members of the Water Management Working Group (WMWG) on some sampling delays we experienced since the last meeting due to unforeseen poor weather conditions.

Ice cover on Meliadine Lake impeded reference and mid-field area sampling until mid-July. Following the ice free conditions which started July 16th, 2020, several sampling attempts had to be cancelled or cut short due to high winds (July 17th, July 18th, July 20th).

Acute toxicity was collected from MEL-14 July 19th, plume delineation was completed July 21st and mixing zone chronic toxicity was completed July 22nd.

As a result of these unforeseen sampling delays, Agnico proposes to hold the next WMWG meeting Monday, August 24th, 2020 and will send updated physico-chemical data, updated water quality and toxicity and the presentation material prior to the meeting.

Kind regards,

Sara
