Hi Jessica,

Thank you for the update.

Great, as you know I will be onsite June 6 and 7 with Jen and my hope is to discuss the system more during that time.

Regards,

Christine

Subject: RE: [EXTERNAL] RO Construction

Christine,

The construction is more or less completed, there are a few things with the electrical programming that remain. All in all we will be ready in time to handle the freshet on site.

We are waiting on mother nature to help thaw some of the CP5 water so that we can begin commissioning of the unit. Obviously we can only begin that once we have water at our disposal.

The approvals for the OMM and Design Report were granted by the NWB.

We have identified our sampling locations and sampling plan, as well as how we will collect water to validate the quality prior to environmental discharge. The discharge tank which will collect CP1 water and treated CP5 water will be recirculated back to CP1 until we have confirmed results of the quality.

If you have any other questions please let me know.

Thanks!

Jessica

Subject: [EXTERNAL] RO Construction

Hey,

Please provide me an update with the construction of the RO unit. I saw the expected completion is May 15th.

Regards,

Christine Wilson, EP
