

TECHNICAL REVIEW
OF
WASTE ROCK STORAGE FACILITY
DESIGN REPORT and DRAWINGS
THE MELIDINE PROJECT

File: 2AM-MEL 1631

Prepared By:

KIVALLIQ INUIT ASSOCIATION

December 11, 2019

Prepared For:

NUNAVUT WATER BOARD

Executive Summary

The Kivalliq Inuit Association (KivIA) have completed a technical review of the documentation related to the Agnico Eagle Mines Ltd. (AEM) submission to the Nunavut Water Board (NWB) on November 27th, 2019, entitled “Waste Rock Storage Facility 1 (WRSF1) Design Report Culvert 15.

The KivIA has completed the review and has found no issues with the information reviewed. However, the KivIA would recommend that AEM moves towards an Adaptive Management Plan (AMP) for WRSF1. The AMP should put in place specific mitigation measures and associated management actions to be taken when specific thresholds are exceeded for the stability, deformation, seepage and permafrost degradation.
