Good morning,

For clarification regarding spill 19-169. ~4L of oil was discovered on 24/4/2019 during a routine drill inspection. During the follow-up investigation it was discovered that the spill had occurred on 15/2/2019, but had not been effectively communicated internally, and therefore was not reported to the spill line. This information will be included in the follow-up report for spill 19-169.

Regards,
