Hi Sergey,

MEL-26 is our discharge to sea monitoring station (FDP). It wasn't in the July monthly report as discharge started in August. This discharge is at Melvin Bay (Itivia site), was approved by the NIRB and fall under the MDMER regulation.

If you want more information, don't hesitate to call me.

Regards,

Martin Theriault

Subject: [EXTERNAL] Meliadine MEL-26 Monitoring Station clarification

CAUTION: EXTERNAL

Good morning Sean,

I am the NWB technical advisor assigned to the Meliadine file.

I cannot locate the MEL-26 Monitoring Station referred to in the Spill report dated August 19 and your July 2019 Monthly Monitoring report. This station does not seem to be included into the QA/QC nor the AEM Plans we currently have on file (the numbering stops at MEL-25 as per the March 3, 2017 Modification Approval Letter). Is this something new?

Could you please clarify this information for me?

Thank you,
