Re: <u>Licence No. 2AM-MRY1325 - Modification Request Re Milne Port Water Diversion System</u>

## Dear Sean Joseph:

On September 1, 2017 the Nunavut Impact Review Board (NIRB or Board) received correspondence from the Nunavut Water Board (NWB) requesting input on modification proposal submitted by Baffinland Iron Mine Corporation's (BIMC) for its "Mary River Project" under the existing Type "A" Water Licence (2AM-MRY1325) to install a diversion ditch around a camp pad. The NWB requested that the NIRB officially provide its determination on whether or not BIMC's proposal falls within the scope of the existing Project Certificate (No. 005) and does not constitute a new activity that would require additional assessment by the NIRB. All materials related to this request can be obtained from the NIRB's online public registry at <a href="https://www.nirb.ca">www.nirb.ca</a> by using any of the following search criteria:

Project Name: Mary River Project

NIRB File No.: 08MN053Application No.: 123910

The NIRB is of the view that the proposed modifications to the Milne Port Water Diversion System under the Type "A" Water Licence for the Mary River Project as described in the materials provided to the NIRB do not appear to be in conflict with the existing terms and conditions of the amended Project Certificate No. 005 as issued by the NIRB, nor do they appear to be beyond the scope of the project as assessed and approved by the NIRB. The NIRB will be further considering the additional camp and fuel storage components noted in the recent applications and provide further direction soon.

Should you have any questions or require clarification related to the NIRB's monitoring program for the Mary River Project, please contact Solomon Amuno, Technical Advisor II and Monitoring Officer, at (867) 983-4603 or <a href="mailto:samuno@nirb.ca">samuno@nirb.ca</a>.

Sincerely,

Tara Arko Director, Technical Services Nunavut Impact Review Board
