Re: Resubmission of Phase 2 Proposal

This letter is to inform the Nunavut Impact Review Board (NIRB) that Baffinland is resubmitting the entire Phase 2 Proposal Final Environmental Impact Statement Addendum (FEIS Addendum) as of Wednesday, October 3rd. In response to the results of the NIRB's conformity review and subsequent recommendations, Baffinland has:

- Developed an additional technical supporting document (TSD 28) to track all proposed changes to its Environmental Management Plans and provide a single, convenient source to access them
- Modified the concordance table to include a clear explanation of terms used and an additional column to mark the page number information can be found on, if possible
- Modified various sections of the FEIS Addendum to address specific deficiencies as identified by the NIRB

Once the upload is complete, Baffinland requests that the previous submission be removed from the registry to reduce any potential for confusion. Print and electronic copies of the updated FEIS Addendum will also be forthcoming.

Baffinland would like to thank the NIRB for their ongoing guidance throughout this process and is optimistic that the additional information provided will lead to a positive conformity determination in the near future, and the initiation of a coordinated review process with the Nunavut Water Board.

Sincerely,

Megan Lord-Hoyle
