Technical Review Comments

2.1 Monitoring of Milne Port Ore Stockpile Runoff Ponds

It was unclear where the monitoring stations for the Milne Port ore stockpiles runoff will be located and whether they will be independent of the monitoring station for sewage effluent.

Baffinland confirmed that there are two monitoring stations for the Milne Port ore stockpile and that they will remain separate from the sewage discharge location.

Conclusion

- AANDC is satisfied with Baffinland's responses to the technical review comments and recommendations.
- AANDC recommends that management plans be updated to include the commitments and additional information Baffinland has provided.
- AANDC will continue to work through the water licence application review process in partnership with the NWB with the aim of protecting Nunavut's freshwater resources.
