Please find remarks coming from Mitimataalik HTO Committee Board Members

HTO's Committee's recommendations are as follows:

Renew licence every year, instead of every few years, due to water that is near hunter's cabin.

It might get hazardous to drink, if it is not reviewed & renewed every year and other species that goes to lakes and rivers..ie... birds, ducks and animals such as caribou.

- Renew licence every year
- Due to lakes, rivers and streams might get hazardous to drink for hunters, animals and ducks.
- Including land locked fishes that don't go to saltwater, oceans
- Due to its caribou calving area, it might be hazardous to drink.
- Keep the monitoring going even those species are not close to mine site, those streams and rivers are still heading everywhere due to that mine site is near to the mountain and that waste water come from top once it goes down and it goes everywhere all the way down to Philip's Creek.

Our questions

Why are you guys giving us last minute to do this and it is busy time of the year.

You guys should notify HTO that there will be deadline for these submission!

When the hearing going to be, is it going to be last minute? I hope you notify us before the last minute.

As per words written by committee member

Judah Innualuk

Mittimatalik HTO

Executive Secretary
