1. INTRODUCTION

Baffinland Iron Mines Corporation (BIM) is committed to remediating areas impacted by current exploration and production activities at their sites on Baffin Island. To comply with this objective, Qikiqtaaluk Environmental (QE) was retained to provide on-site repackaging and off-site disposal of hazardous waste from the Mary River and Milne Inlet sites for the 2020 season. Between June 26 and July 9, 2020, QE provided Environmental Quality Assurance Specialists to ensure the on-site repackaging, identification, labelling, and documentation of hazardous waste for off-site shipment met with applicable regulatory requirements. Messrs. Yvon Beaudoin and Jacques D'Amour, HAZMAT[1] specialists, conducted the fieldwork. The work was carried out at 2 locations: Mary River and Milne Inlet. Photographs of the on-site waste staging are presented in Appendix A.
