Hello Abid,

I trust all is well. I am reaching out to request an extension to October 1st 2026, on the initial preliminary response process for 2025 QIA/NWB Annual Report intervenor comments.

The deadline of September 4th is an opportunity to respond to comments with initial information that may close the comment from our perspective or identify that further engagement with subject matter experts or future monitoring initiatives are required to respond to a comment by March 31st.

However similar to last year, having received the initial comment response request during our busy field season and outside of our reporting season, with a due date of September 4th, is extremely challenging for us to attain. It is important for Baffinland to provide diligent responses to the intervenor comments, while engaging expert advice on the subject matter.

This extension request is in alignment with last year as the same challenges persist in 2026.

I am available to have a discussion at your convenience.

Kind regards,

Bill
