1 INTRODUCTION

1.1 PURPOSE

The purpose of this 2022 Marginal Closure and Reclamation Financial Security Estimate ('2022 Estimate') is to provide a summary of the closure and reclamation security estimated to be required for the Mary River Project (the Project) to meet reclamation objectives as outlined in the Interim Mine Closure and Reclamation Plan (BAF-PH1-830-P16-0012). The total 'global' closure and reclamation security estimated to be required takes into consideration planned work in 2022 being conducted under Type "A" Water Licence 2AM-MRY1325, Amendment No. 1 and the Qikiqtani Inuit Association's (QIA) Commercial Lease No. Q13C301 in addition to previous Project closure and reclamation security.

The 2022 Estimate is intended to be inclusive of all closure and reclamation costs estimated to be required for a 3rd Party Contractor to perform the work in a 'worst-case' scenario for all disturbed areas, project components and project activities existing on the Mary River Project site upon conclusion of the 2022 Work Plan. For the purpose of this document, the material changes associated to security from the 2022 Work Plan are termed, '2022 Work Plan Security Estimate'.

In order for the 2022 Estimate to accurately reflect the total 'global' closure and reclamation security estimated to be required for the Project in 2022, this document also provides a summary of the identified Project components and activities that have materially changed since the 2021 Work Plan Addendum. Based on these identified material changes, the resulting associated security impacts (+/- \$) are also presented for incorporation into the 2022 Estimate to ensure accurate representation of the Project based on current planning.

1.2 REGULATORY CONTEXT

An annual adjustment to reclamation security is required under Section 9.2 of the Commercial Lease, No. Q13C301, agreed to between Baffinland and the QIA, as well as a requirement under the Type 'A' Water Licence 2AM-MRY1325, Amendment No. 1 (Part J, Item 3), and in consideration of the QIA Abandonment and Reclamation (A&R) Policy (QIA, 2013). Additionally, Part C, Item 3 of the Type 'A' Water Licence 2 AM-MRY1325 and Section 9.2, Part i) of the Commercial Lease, No. Q13C301 allows for Baffinland (the Licensee) to request a change to the total amount of security outside of the ASR process. The 2022 Estimate therefore represents Baffinland's proposed adjustment to reclamation security to account for work conducted on site to date and planned work to be completed as described in the 2022 Work Plan. The amount of security estimated to be required is based on an estimate of the highest reclamation liability in the upcoming year¹ or 'worst case' scenario.

1.3 APPLIED RATES

The Arbitration between Baffinland and QIA regarding the 2019 Work Plan sought to resolve areas of high uncertainty and discrepancy between the respective estimates, including the unit rates to be applied.

 $^{^{\}rm 1}$ As per Type 'A' Water Licence 2AM-MRY1325, Amendment No. 1, Schedule C, Part 6, Item c.

Based on the direction from the Final Award, Baffinland's unit rates as presented in the 2019 Estimate were upheld. As a result, Baffinland has continued to utilize the established methodology from the 2014 Complete Project Financial Security Assessment, with the updated contractor rates included in the 2019 Work Plan.

The 2022 Estimate was developed by applying the direct cost unit rates to quantities of functional units of each activity or project component proposed/changed under the 2022 Estimate, unless indicated otherwise.

Based on the direct cost estimate, indirect costs required to support direct cost work were accounted for proportional to assumptions and considerations applied in the 2014 Complete Project Financial Security Assessment² and the outcomes of the Arbitration between Baffinland and QIA regarding the 2019 Work Plan. Indirect costs are additional costs outside of costs required for direct reclamation activities that are required to ensure reclamation objectives are met. The sum of direct and indirect estimated costs for the 2022 Estimate was then differentiated based on geographic liability allocation (IOL vs. Crown land) and relation to land or water liability. Appendix A presents the Mary River Project Estimate Breakdown Structure (EBS) which demonstrates the results of this process for all activities or project components proposed under the 2022 Estimate and all previous project financial security liabilities as described in previous ASR submissions.

All costs are in Canadian Dollars (CAD). All monetary totals are rounded to the nearest '000.

1.4 DOCUMENT STRUCTURE

The following outlines the structure of the 2022 Estimate document:

- Section 1 presents the purpose, regulatory context, applied rates used, and document structure applicable to the 2022 Estimate.
- Section 2 describes the '2021 Work Plan Reconciliation', and its resulting impacts to the 2022 Estimate.
- Section 3 provides a summary of the financial security estimated to be removed from the Estimate due to the 2021 Work Plan Addendum.
- Section 4 provides a summary of the financial security estimated to be required for marginal closure and reclamation liability increase associated with the Mary River Project 2022 Work Plan ('2022 Work Plan Security Estimate').
- Section 5 summarizes net impacts to the 2022 Estimate: and
- Section 6 lists supporting documentation that was available to determine costs and quantities for the purpose of the 2022 Estimate.

² As described in 2014 Complete Project Financial Security Assessment, H349000-1000-07-126-0018, Rev.1. Hatch. Submitted to parties October 31, 2014.

2 2021 WORK PLAN RECONCILIATION

In order for the 2022 Estimate to accurately reflect the total 'global' closure and reclamation security estimated to be required for the Project in 2022, the previous year's project estimates need to be reconciled. Activities previously proposed that require reconciliation fall into the following categories:

- a) Activities that have had security allocated to them that are no longer planned to be conducted.
- b) Activities that have been conducted but have no security explicitly allocated to them; and
- c) Materials and equipment that have arrived at the Project on the 2021 sealift, and were under or overestimated in 2021, or were backhauled from the project on the 2021 sealift.

The activities that fall into the above categories and their corresponding reconciliation action are described in the sub sections below. It should be noted that all activities in the 2021 Work Plan were planned to be conducted on Inuit Owned Land (IOL), and as a result all adjustments presented are relative to the IOL liability only.

For reconciliation of the mechanical and mobile equipment, the 2021 inbound manifests were compared with the 2021 Work Plan equipment list. If any new items brought to site were identified in the manifests that were not originally in the 2021 list, the new items were added to the Estimate Breakdown Structure (EBS) as "2022-R". Items that were included in the 2021 list but did not arrive to site (i.e., not included in the manifest), were removed from the Estimate Breakdown Structure (EBS) as "2022-R".

2.1 GRADE AND RE-CONTOUR

Baffinland has proposed that annual satellite imagery be used to reconcile the active and potential footprint of the Mary River Project relative to the quantities estimated in the annual Work Plan and ASR process since 2014. Baffinland retains high resolution satellite imagery annually, typically collected over the month of August to ensure a snow-free landscape and collected over multiple attempts to reduce the potential for cloud cover. It is acknowledged that this imagery is a snapshot in time of the project footprint, however the collection of this imagery on an annual basis allows for a consistent comparison between years.

In this 2022 Reconciliation, Baffinland presents the outcomes of the Disturbed Areas Analysis completed following the receipt of imagery collected in July-September 2021. Imagery was analyzed by Baffinland staff and the Geographic Information Systems (GIS) coordinator to determine the extent of disturbed areas and accurately delineate these areas. In addition, lined areas were delineated separately (e.g. ponds, hazardous waste berms), where the "Grade and Contour with Liner" unit rate would apply.

Additionally, Baffinland included infrastructure that was previously planned for construction but has yet to be completed, such that the estimate of disturbed area is representative of the highest potential liability for the work proposed in the previous and current Work Plan. Therefore, the Proposed Disturbed Areas are representative of work yet to be completed from the 2014 Work Plan through to the current 2022 Work Plan.

The results of the disturbed area analysis are presented in Appendix B, and Table 2-1. Results are presented based on: the landowner, actual and proposed disturbance, and lined and proposed lined areas.

IOL **Crown Land Disturbed Proposed Proposed Disturbed** Proposed **Project Site Lined Area Disturbed Area Disturbed** Area **Lined Area** Area (m²)(m²)(m²) (m²)Area (m²) (m²)Milne Port 1,526,060 376,722 51,077 43,903 0 0 0 **Tote Road** 1,434,661 0 100,697 332,245 Mine Site 2,620,626 854,035 98,634 32,683 0 0 **Total** 5,581,347 1,230,757 149,711 32,683 144,600 332,245

Table 2-1: Disturbed Areas Analysis by Landowner

Based on the above analysis, the combined actual and proposed results were compared with the values in the Estimate Breakdown Structure (EBS) for years 2014 through to new works proposed in the 2022 Work Plan. In order to best track and reconcile the difference between the 2021 Disturbance Analysis and the EBS items, the EBS items were summed and subtracted from the estimate, while the new values from the 2021 Disturbance Analysis were added. This is presented in Table 2-2. The result is an increase in the value for grade and contour, and grade and contour with a liner totaling \$1,174,393.

Table 2-2: Disturbed Areas Analysis by Unit Rate Type

Description	Unit Rate Type	Unit Rate (\$/m²)	Quantity (m²)	Cost (\$) ¹
	IOL – Grade and Contour			
Actual Disturbed Area Reconciliation - 2020 Satellite Image - IOL	Grade and Contour	1.49	5,581,347	8,343,603
Proposed Disturbed Area Reconciliation - 2021 Work Plan and Prior - IOL	Grade and Contour	1.49	1,230,757	1,839,869

		TOTAL	770,486	1,174,393

NOTES

1) Grand total rounded to nearest '000

2.2 MECHANICAL AND MOBILE EQUIPMENT

The position presented by Baffinland during the 2021 ASR was based on the forecasted equipment expected to be delivered to site in 2021. The actual type and quantity of equipment delivered to site in 2021 varied from the forecasted estimate and therefore during the 2021 Reconciliation process Baffinland adjusted the EBS, as itemized in Table 2-3 below, to ensure the 2022 Estimate reflects the most up to date information. Items with a negative value were the result of less equipment arriving than what was forecast in 2021, and a positive value represent additional equipment to what was represented in the 2021 Work Plan.

Table 2-3: Baffinland Owned Mechanical and Mobile Equipment Reconciliation

Description	Unit Rate Type	Unit Rate (\$/pcs)	Quantity (pcs)	Cost (\$)1
374 CAT Excavator	Heavy Mobile Equipment	2,075.0	-1	-2,075

3 2021 WORK PLAN ADDENDUM

In July 2021 Baffinland presented the 2021 Work Plan Addendum for the Mary River Project as required under Section 6.1 of Commercial Lease No. Q13C301 (the Lease) agreed between Baffinland Iron Mines Corporation (Baffinland) and the Qikiqtani Inuit Association (QIA). Additionally, reclamation security associated with 2021 Work Plan Addendum is a requirement under Amendment No. 1 of the Type 'A' Water Licence 2AM-MRY1325, however, it is noted that this Addendum only pertains to works and equipment on Inuit Owned Land, and security held by the QIA under the Commercial Lease. In the event the Project does not advance, the work items as described and constructed in the 2021 Work Plan Addendum will be subject to reclamation, as per the Mary River Project Interim Closure and Reclamation Plan (BAF-PH1-830-P16-0012, refer to Appendix C) and relevant regulatory and permit obligations.

The purpose of the 2021 Work Plan Addendum was to update and revise plans for the 2021 year, including backhaul of equipment by sealift. Several works identified in the 2021 Work Plan and prior years have been deferred indefinitely or removed from the current scope of the Project. An overview of these works are as follows:

- 1. Deferment of the mobilization of the shiploader 'Module'.
- 2. Deferment of the development of quarries and laydowns within the Tote Road corridor.
- 3. Revisions to equipment and materials to arrive on the 2021 sealift; and
- 4. Backhaul of contractor equipment and materials during the 2021 sealift.

Refer to document 2021 WORK PLAN ADDENDUM, Rev. 0, Appendix F of the 2022 Work Plan for a detailed description of the 2021 Work Plan Addendum for the Mary River Project.

There are no proposed updates to the Interim Closure and Reclamation Plan (ICRP) associated with this Work Plan Addendum.

The revision of securities for the 2021 Work Plan Addendum is divided into two (2) tranches.

- Tranche 1 Works that have not yet been completed and are deferred and/or cancelled, as well as equipment that has not been mobilized to Site and is deferred and/or cancelled; and
- Tranche 2 3rd Party Equipment that was demobilized from Site on the 2021 sealift.

The revision of securities for the 2021 Work Plan Addendum for Tranche 1 and Tranche 2 are allocated as summarized in Table 3-1 and Table 3-2, respectively.

Financial Security Estimate, Revision 2

4 2022 WORK PLAN

4.1 INTRODUCTION

The purpose of this section of the document is to provide a summary of the additional financial security estimated to be required for work items described in the Mary River Project 2022 Work Plan (1 November 2021). The estimated marginal closure and reclamation financial security required to account for 2022 planned work ('2022 Work Plan Security Estimate') is intended to be aggregated with the changes to the 2021 Work Plan reconciled in the above Section 2. The combination of the reconciliation in Section 2, and the estimate presented in this Section will provide a comprehensive update to the 'global' estimate and the marginal increase required for 2022. The result of this approach, the estimated project-wide or 'global' closure and reclamation security bonding totals for the Mary River Project to-date, are presented in Section 5.

A detailed description of the work activities captured in the 2022 Work Plan Security Estimate are described in the Baffinland 2022 Work Plan and are summarized in Section 4.2 below.

4.1.1 Closure Scenario

The 2022 Work Plan Security Estimate is based on a scenario that assumes all planned activities for 2022 Work Plan have taken place on site and all material/consumables (excluding fuel) that are mobilized to site in 2022 are in full inventory. All other assumptions relating to the estimation of direct and indirect costs, including fuel, associated with the 2022 Work Plan Security Estimate are consistent with the assumptions established in the 2014 Complete Project Financial Security Assessment and previous ASR documentation unless noted otherwise.

4.2 2022 PLANNED ACTIVITIES

As described in the 2022 Work Plan, planned work in 2022 is being conducted under the amended Project Certificate No. 005 Amendment No. 3, QIA Commercial Lease No. Q13C301, Type 'A' Water Licence 2AM-MRY1325, Amendment No. 1 and Type 'B' Water Licence 8BC-MRY1416.

The following list represents the activities from the 2022 Work Plan planned for implementation in 2022 but will only proceed following the applicable regulatory approvals where required, and approval from QIA including the posting of any relevant marginal security adjustments or adjustments to the Commercial Lease (e.g. OEN, TRAN). This planned work includes:

- 1. Development and operation of the mine, ore crushing and land transportation, stockpiling, and marine shipment of ore.
- 2. The continued development and construction of infrastructure required at Milne Port and the Mary River Mine Site (Mine Site) and along the Tote Road for the Mary River Project.
- 3. Continued operation of Mine Site and Milne Port Camps to support ongoing operations and construction activities which will include the use of water and deposition of waste as authorized under existing permits.

- 4. On-going operation and expansion of permitted quarry and borrow sources.
- 5. At Milne Port, vessels carrying fuel, equipment, and supplies for use at the Mine Site and Milne Port will arrive during open water. Material, fuel, and supplies required for operational and construction activities will be transported to the Mine Site year-round via the Tote Road.
- 6. Ongoing environmental effects studies and baseline data collection will continue to support the construction and operation of the Project as well as for future engineering requirements.
- 7. Continued environmental monitoring in accordance with the approved Project Certificate, licenses, authorizations, management plans and environmental effects monitoring plans.
- 8. On-going exploration activities including drilling, mapping, prospecting, sampling, and geophysics. Planning of the details of the summer drilling and/or trenching program is not yet finalized.
- 9. Tote Road improvements to address safety concerns, freshet runoff issues and poor road conditions during the spring and summer periods.
- 10. Continued construction of additional fuel storage at the project.
- 11. Site grading and laydown construction for supplies and equipment to support future construction activities and remove ponding and permafrost degradation issues around current infrastructure.
- 12. Erection of additional maintenance facilities to safely service equipment.

A detailed description of these work activities is provided in the Baffinland 2022 Work Plan.

4.3 2022 WORK PLAN SECURITY ESTIMATE ASSUMPTIONS

4.3.1 Direct Cost Assumptions

The following sub-sections describe the assumptions used to establish the direct costs allocated in the 2022 Work Plan Estimate based on the 2022 Work Plan. Please refer to Appendix A for details of this cost allocation based on the Estimate Breakdown Structure (EBS), and Appendix D for supporting documentation relating to estimated unit quantities (where available). Direct cost allocations were applied to quantities as indicated in the 2022 Work Plan and consistent with the direct cost assumptions described in the 2014 Complete Project Financial Security Assessment.

4.3.1.1 Buildings and Foundations

The 2022 Work Plan Security Estimate allocates \$117,000 plus proportional cover material application costs, in direct costs to account for a marginal increase of buildings and foundations associated with the 2022 Work Plan. This marginal increase of buildings and foundations is itemized in the EBS as presented in Appendix A. This additional cost allocation is based on:

- Enhancement of training grounds for the Emergency Response Team with fire retardant infrastructure and secondary spill containment.
- Addition of offices/ trailers at the Environment Department work areas.

- Construction of a new COVID-19 PCR testing lab building at the Mine Site.
- Washcar (bathroom).
- New building and expansion of Mary River HD Maintenance Shop.
- Bit shack (container building).
- Replacement of inflatable building with rigid building.
- Lube / Def Container.

A summary of security costs associated with the marginal increase of buildings and foundations associated with the 2022 Work Plan is shown in Table 4-1.

Table 4-1: Summary of Marginal Increase of Buildings and Foundation Areas

Description	Unit Rate Type	Unit Rate (\$/m²)	Quantity (m²)	Cost (\$)1
	Milne Port			
Enhancement of training grounds for the Emergency Response Team with fire retardant infrastructure and secondary spill containment	ISO Shipping Containers	23.8	59	1,416
Addition of offices/ trailers at the Environment Department work areas	ISO Shipping Containers	23.8	56	1,328
	Mine Site

4.3.1.2 Mechanical and Mobile Equipment

The 2022 Work Plan Security Estimate allocates \$77,000, plus cover material application costs, in direct costs to account for a marginal increase of mechanical and mobile equipment as itemized in the 2022 Work Plan. This cost allocation is based on an additional 62 pieces of Baffinland owned mechanical or mobile equipment to be mobilized to site in 2022.

A summary of the marginal increase of costs associated with mechanical or mobile equipment and associated unit rates is shown in Table 4-2.

Table 4-2: Summary of Marginal Increase of Mechanical and Mobile Equipment

Description	Unit Rate Type	Unit Rate (\$/pcs)	Quantity (pcs)	Cost (\$) ¹
Communication tower KM 108	Light Equipment	1,583.8	1	1,584
Jet A truck	Heavy Mobile Equipment	2,075.0	1	2,075

NOTE:

As part of the 2022 Reconciliation, Baffinland presents the outcomes of the Baffinland Equipment Inventory Audit completed as part of the preliminary path forward on items with high uncertainty for the Mary River Financial Security Estimate. Using an SAP Equipment List, supplemented by a two-week onsite validation, a total of 1,778 pieces of equipment, as described in Table 4-3, were found at Baffinland's Mary River Project sites. The audit confirmed 1,215 pieces of equipment in the field. Refer to Appendix C for a detailed breakdown of the Baffinland Equipment Inventory Audit.

Table 4-3: Baffinland Owned Equipment Inventory Audit Results

Description	SAP	Found ¹	Total	
Extracted	4,132	0	4,132	
Confirmed	1,127	88	1,215	
Counted	1,690	88	1,778	
Light Equipment	233	14	247	
Medium Equipment	495	70	565	
Heavy Equipment	103	4	107	
Light Mobile Equipment	293	0	293	
Medium Mobile Equipment	329	0	329	
Heavy Mobile Equipment	237	0	237	
Note: 1. Found equipment was allocated as part of BIM owned equipment in the EBS				

Thirty-four (34) pieces of equipment included in the Baffinland Equipment Inventory Audit Results were not included in the EBS as part of the 2022 Reconciliation, since the equipment was identified as being part of bonded Vendor Packages (namely Ship Loader and Incinerator). See Table 4-4 for a list of equipment not included in the EBS.

Based on the results of the Baffinland Equipment Inventory Audit Results, the combined actual and proposed results were compared with the values in the Estimate Breakdown Structure (EBS) for years 2014 through to new works proposed in the 2022 Work Plan. In order to best track and reconcile the difference between the Baffinland Equipment Inventory Audit Results and the EBS items, the EBS items were summed and subtracted from the estimate, while the new values from the Baffinland Equipment Inventory Audit Results were added. This is presented in Table 4-5 The result is an increase of 297 pieces of BIM owned equipment, totalling an increase of \$1,496,548.

Table 4-5: Baffinland Owned Equipment Inventory Audit Reconciliation

Description	Equipment Audit ¹	EBS items	Difference	Cost (\$) ²
Extracted	3,908			
Confirmed	1,207			
Counted	1,744			
Light Equipment	238	216	22	34,843

Heavy Equipment	97	85	12	395,400
Light Mobile Equipment	291	308	-17	-12,396
Medium Mobile Equipment	329	344	-15	-17,438
Heavy Mobile Equipment	237	308	-71	-147,325
TOTAL	1,744	1,447	298	1,496,548

NOTES:

- 1. The numbers in the 2021 Equipment Audit Results exclude the 34 pieces of equipment removed from the Inventory Audit Results (refer to Table 4-4).
- 2. The cost associated with BIM Owned equipment accounts only for the direct cost associated with the disassemble, load and transport of the of Baffinland owned mechanical or mobile equipment.

4.3.1.3 Site Works

The 2022 Work Plan Security Estimate allocates \$780,000, in direct costs to account for a marginal increase of disturbed areas that would have to graded and re-contoured associated with the 2022 Work Plan. This additional cost allocation is based on:

- Construction of Landfarm Cell 4 and expansion of Cell 3.
- Construction of Stockpile Pond east of KM 106.
- Expansion to KM 105 Equipment Laydown east and west.
- Mobile equipment laydown and tire facility.
- Construction of a West perimeter road to bypass pit, 510 Hillside Road, 470 Hillside Road and Bypass road from cross-cut road towards waste dump.
- Expansion to the sedimentation pond at KM 105 to manage surface water runoff.
- Construction of new Sedimentation Pond SDLT-1.
- Expansion to the Water Treatment Plant Pad.
- Construction of Hazardous Waste Berm east of Waste Management Building at Mine Site; and
- Construction of new Sedimentation Pond Camp Lake.

This marginal increase is based on an additional 441,245 m^2 of disturbed areas at a unit rate of \$1.49/ m^2 for unlined or \$4.12/ m^2 for lined and is itemized in the EBS as presented in Appendix A and outlined in Table 4-6.

Table 4-6: Summary of Marginal Increase of Disturbed Areas Requiring Grade and Re-Contour

Description	Unit Rate Type	Unit Rate (\$/m²)	Quantity (m²)	Cost (\$)¹
	Mine Site			
Ore Stockpiling area at KM 105.5	Grade and Re- Contour	1.5	114,847	171,686
Expansion to KM 105 Equipment Laydown east	Grade and Re- Contour	1.5	27,509	41,083
Expansion to KM 105 Equipment Laydown west	Grade and Re- Contour	1.5	36,332	54,259
Mobile equipment laydown and tire facility	Grade and Re- Contour	1.5	14,108	21,069
Construction of a West perimeter road to bypass pit	Grade and Re- Contour	1.5	74,577	111,375
510 Hillside Road	Grade and Re- Contour	1.5	11,423	17,059
470 Hillside Road	Grade and Re- Contour	1.5	2,429	3,628
Bypass road from cross-cut road towards waste dump	Grade and Re- Contour	1.5	24,534	36,640
Expansion to the sedimentation pond at KM 105 to manage surface water runoff	Grade and Re- Contour	1.5	19,238	28,759
Expansion to the sedimentation pond at KM 105 to manage surface water runoff	Grade and Re- Contour with Liner	4.1	6,687	27,699
Construction of new Sedimentation Pond SDLT-1	Grade and Re- Contour	1.5	58,324	87,189
Construction of new Sedimentation Pond SDLT-1	Grade and Re- Contour with Liner	4.1	20,678	85,654
Construction of new Sedimentation Pond Camp Lake	Grade and Re- Contour with Liner	4.1	10,000	41,423
Expansion of Landfarm Cell 3	Grade and Re- Contour with Liner	4.1	1,288	5,335
Construction of Landfarm Cell 4	Grade and Re- Contour with Liner	4.1	4,611	19,100
Expansion to the Water Treatment Plant Pad	Grade and Re- Contour	1.5	10,500	15,697
Hazardous Waste Berm - New 2019 ³	Grade and Re- Contour with Liner	4.1	-360	-1,482

³ The 2019 Work Plan Security Estimate allocated \$1,482 in direct costs associated with the construction of a new hazardous waste berm at the Mine site, which included a 360 m² of lined area. According to the design, the new berm will have 2,700 m² of lined area and 1,820 m² of unlined area. In order to reconcile the EBS, 360 m² were removed from the EBS, and the new areas (2,700 m² of lined area and 1,820 m² of unlined area) were included

Description	Unit Rate Type	Unit Rate (\$/m²)	Quantity (m²)	Cost (\$)¹
Mine Site Hazardous Waste Berm	Grade and Re- Contour	1.5	1,820	2,718
Mine Site Hazardous Waste Berm	Grade and Re- Contour with Liner	4.1	2,700	11,116
		TOTAL	441,245	780,007

NOTES

1) Grand total rounded to nearest '000

4.3.1.4 Storage Tanks

The 2022 Work Plan Security Estimate allocates \$17,000 in direct costs to account for the mobilization of additional water and fuel tanks to the Project Site in the 2022 Work Plan, including the construction of one 250,000 L Fuel tank and one 15,000 L Fuel tank at the Mine Site.

A summary of the marginal increase of costs associated with storage tanks and associated unit rates is shown in Table 4-7.

Table 4-7: Summary of Marginal Increase of Storage Tanks

Description	Unit Rate Type	Unit Rate (\$/pcs)	Quantity (pcs)	Cost (\$)¹
250,000-liter Fuel tank	Medium Mobile Diesel Tanks	8,381.3	1	8,381
15,000-liter Fuel tank	Medium Mobile Diesel Tanks	8,381.3	1	8,381
		TOTAL	2	17,000

NOTES

1) Grand total rounded to nearest '000

4.3.1.5 Cabling

The 2022 Work Plan Security Estimate allocates \$45,000 to account for the installation of 2,100 m of cabling at the Mine Site and Milne Port areas for the installation of additional electrical cables for:

- Power Distribution cabling from the new KM 110 building to the Mine water treatment facility (500 m).
- Power Distribution cabling and distribution equipment for a new service from the Port Powerhouse area to CV-001 on the shiploader (800 m).
- Power Distribution cabling (from the Powerhouse to Dyno Nobel explosives facility) (500 m); and
- Power Distribution cabling (from E-House 3 to KM 104 laydown) (300 m).

This cost allocation is based the unit rate of \$21.3/m, and a total length of 2,100 m of cable, and is itemized in the EBS presented in Appendix A.

4.3.1.6 Deposit 1 Drainage Channel

The 2022 Work Plan Security Estimate allocates \$7,600 in direct costs to account for the construction of a 300m long drainage channel to account for the free drainage of the Deposit 1 area prior to a pit being developed at Deposit 1. This channel would only be constructed in a long-term closure scenario occurring prior to a pit being developed at Deposit 1.

This marginal increase is based on a drainage channel 300 m long, 2 m wide and 1 m deep (600 m³ of material), at a unit rate of \$12.7/m³. The unit rate accounts for costs to Drill & Blast, Excavate, Load and Haul 2km.

A summary of the marginal increase to the estimate for the Deposit 1 Drainage channel is shown in Table 4-8.

 Description
 Unit Rate (\$/m²)
 Quantity (m²)
 Cost (\$)¹

 7,594

 TOTAL
 600
 7,600

Table 4-8: Marginal Increase for Deposit 1 Drainage Channel

NOTE:

1) Grand total rounded to nearest '000

4.3.1.7 Fill Application

The 2022 Estimate removes \$11,895 to account for application of cover material due to the marginal decrease of demolition materials to be disposed of on-site due to the update to the EBS with the Baffinland Equipment Inventory Audit.

This cost allocation is based on a decrease of -306 m² of compacted material requiring fill application at an assumed disposal depth of six (6) meters. A summary of the marginal decrease in fill application in the 2022 Security is shown in Table 4-9.

The following section describes the assumptions used to establish the indirect costs allocated for the purpose of the 2022 Work Plan Security Estimate. Unless noted otherwise, see the 2014 Complete Project Financial Security Assessment (H349000-1000-07-126-0018, Rev. 1) for further supporting information on the specific indirect unit rates and multipliers used below.

Table 4-9: Marginal Increase of Fill Application

Description	Unit Rate (\$/m²)	Quantity (m²)	Cost (\$)¹
Fill Application - 2022	38.8	527	20,473
Fill Application - 2022-R	38.8	-834	-32,368
	TOTAL	-306	-11,895

NOTES

1) Grand total rounded to nearest '000

4.3.2 Indirect Cost Assumptions

4.3.2.1 On-Site Fuel Demobilization and Reclamation Fuel Mobilization

The 2022 Estimate allocates an additional \$222,680 to account for the demobilization of fuel stored on Site, and the mobilization of fuel required for the marginal increase in reclamation activities captured in the 2022 Estimate. It is assumed 50% of this fuel would need to be demobilized at closure. This is based both on the assumption that the tanks would be likely to be entirely full at closure, and that some fuel on Site would be available for reclamation activities. The fuel demobilization rate is assumed to be \$0.10/L. There are no increases to the fuel storage at the Site in 2022.

The additional \$222,680 allocation for fuel mobilization is based on the cost of mobilizing 100% of the fuel required (556,699 L) for marginal reclamation and closure activities, including direct activities, power generation, and heat production. The marginal increase in reclamation activities in 2022 are estimated to require an additional 258,914 L of Type-1 fuel (see Appendix A). Marginal increases in camp operation during reclamation is estimated to require an additional 2,578 person-days on-site. Each person-day on site is assumed to consume 116 L of Type-1 fuel for heat and power generation. This totals 297,785 L of Type-1 fuel required to heat and power the camp. Fuel mobilization rate is assumed to be \$0.40/L.

See Appendix A for itemized person-day and fuel consumption quantities per item in the 2022 Estimate.

4.3.2.2 Contaminated Soil

The 2022 Estimate includes an allowance of \$257,659 for management of metal-contaminated soil that may be present at the Ore storage and crusher areas. This is in response to a CIRNAC query related to closure costs for management of potential metal-contaminated soil in these areas. Baffinland has identified the potential for metal-contaminated soil beneath ore storage and crusher areas as an item of uncertainty in the Interim Closure and Reclamation Plan for the Mary River Project.

The total footprint associated with metal contaminated soil areas is 517,009 m² (Table 4-10). Assuming an average depth of contamination of 200 mm, the total volume of metal-contaminated soil 103,402 m³ (Table 4-10). Baffinland is proposing that at closure, the total volume of metal-contaminated soil should be regraded within the individual ore storage areas to create a 1 m high landform with a smaller overall footprint. This landform would then be covered with a 500 mm clean material cap.

Table 4-10. Total Footprint and Volume of Metal-Contaminated Soil

Area	Footprint (m²)	Volume of Contaminated Soil (m³)
Milne Port Ore Stockpile	327,719	65,544
Crusher Pad	104,252	20,850
ROM	85,038	17,008
Total Footprint	517,009	103,402

Table 4-11 presents the consolidated footprint to be covered, cover material sourcing and volume, the unit rate to excavate, load & haul, and the additional reclamation security to be paid.

Area	Footprint (m²)	Source of cover material	Distance to be Hauled (km)	Volume of cover material (m³)	Unit Rate ¹ (\$/m³)	Total Security (\$)
Milne Port Ore Stockpile	65,544	Existing laydowns	1	32,772	4.02	\$131,638
Crusher Pad	20,850	Existing laydowns	1	10,425	4.02	\$41,875
ROM	17,008	NAG from the WRF	5	8,504	9.90	\$84,147
Total	103,402			51,701		\$257,659

Table 4-11. Contaminated Soil Calculation

4.3.2.3 Mobilization of Workers Required for Reclamation

The 2022 Estimate allocates an additional \$212,226 for worker mobilization. Detailed assumptions for mobilization of workers required for marginal closure and reclamation activities are as follows.

Person-hours required to complete direct cost related on-site marginal reclamation activities is estimated to be 25,782 hrs or 2,578 person-days (based on 10hr/day productivity). See Appendix A for itemized person-day allocations per 2022 Estimate item.

- Assume 70% of hires (1,805 person-days) are from southern communities and 30% (773 person-days) are from northern communities.
- Cost per person-day on site for worker mobilization from southern communities is \$85.45/person-day on-site.
- Cost per person-day on site for worker mobilization from northern communities is \$75.00/person-day on-site.

4.3.2.4 Worker Accommodation & Camp Operation

The 2022 Estimate allocates an additional \$581,389 for worker accommodation and camp operation during marginal reclamation activities associated with the 2022 Estimate. Assumptions for worker accommodation and camp operation are:

- Person-hours required to complete direct cost related on-site marginal reclamation activities is estimated to be 25,782 hrs or 2,578 person-days (based on 10hr/day productivity). See Appendix A for itemized person-day allocations.
- Cost for accommodation and camp operation is assumed to be \$225.50/person-day and includes camp maintenance, catering, housekeeping, and fuel costs.

4.3.2.5 Mobilization and Demobilization of Equipment and Materials

The 2022 Estimate allocates an additional \$364,159 to account for mobilization and demobilization of equipment and materials. These are indirect costs for moving equipment and materials to and from the

L. Unit rates are based on the costs to excavate, load and haul for the distances specified in the table

reclamation site. The amount is based the assumption that mobilization and demobilization cost are estimated as 10% of total direct costs.

4.3.2.6 Demobilization of 3rd Party Equipment

To account for the demobilization of 3rd party equipment, Baffinland presents the outcomes of the Baffinland Equipment Inventory Audit completed as part of the preliminary path forward on items with high uncertainty for the Mary River Financial Security Estimate. Using 3rd Party Vendor reported equipment, supplemented by a two-week onsite validation, a total of 335 pieces of equipment as defined by Table 4-12 were found at Baffinland. The audit confirmed 155 pieces of equipment in the field. Refer to Appendix C for a detailed breakdown of the Baffinland Equipment Inventory Audit.

Table 4-12: Baffinland 3rd Party Equipment Inventory Audit Results

Description	Vendor
Extracted	658
Confirmed	155
Counted	335
Light Equipment	87
Medium Equipment	72
Heavy Equipment	19
Light Mobile Equipment	66
Medium Mobile Equipment	66
Heavy Mobile Equipment	25

Based on the results of the Baffinland Equipment Inventory Audit Results, the combined actual and proposed results were compared with the values in the Estimate Breakdown Structure (EBS) for years 2014 through to new works proposed in the 2022 Work Plan. In order to best track and reconcile the difference between the Baffinland Equipment Inventory Audit Results and the EBS items, the EBS items were summed and subtracted from the estimate, while the new values from the Baffinland Equipment Inventory Audit Results were added. This is presented in Table 4-13. The result is a decrease of 125 pieces of 3rd Party equipment, totalling a decrease of \$2,222,279.

Table 4-13: Baffinland Owned Equipment Inventory Audit Reconciliation

Description	Equipment Audit	EBS items	Difference	Cost (\$)
Extracted	658			
Confirmed	155			
Counted	335			
Light Equipment	87	157	-70	-195,019
Medium Equipment	72	102	-30	-246,080
Heavy Equipment	19	201	-182	-2,905,544
Light Mobile Equipment	66	0	66	183,875
Medium Mobile Equipment	66	0	66	541,376
Heavy Mobile Equipment	25	0	25	399,113
Total	335	460	-125	-2,222,279

4.3.2.7 Care & Maintenance, Closure and Post Closure Monitoring

The 2022 Estimate includes an increase to Care and Maintenance, Closure and Post Closure Monitoring to account for increases in the volume of water to be treated at closure. This increase is representative of the average volume of water requiring treatment at closure. Based on discharges since 2014 as detailed in Table 4-14, the average volume of water discharged from the Waste Rock Facility (MS-08) is 48,222 m³. Accordingly, Baffinland will increase the Closure and Post Closure Monitoring Cost to account for three (3) years of treatment, for a total cost of \$144,667. This results in an increase of \$7,389 over the current allocation for water treatment.

Table 4-14: Discharge Volumes for the Waste Rock Facility (MS-08)

Year	Total Discharged (m³)			
2021	63,000			
2020	63,919			
2019	117,000			
2018	73,600			
2017	13,500			
2016	4,320			
2015	2,217			
2014	-			
Average	48,222			

Baffinland acknowledges that there are other areas of the mine that require water treatment on an asneeded basis, including the Milne Port Tank Farm (MP-03), the Milne Port Landfarm (MP-04), the Milne Port Contaminated Snow Containment (MP-04a) and the Mine Site Hazardous Waste Berm 7 (MS-HWB-07). While many or all of these sources will be eliminated in closure, the total average discharge from all of these facilities combined will be added to the Closure and Post Closure Monitoring estimate as a

conservative measure. The average volume discharged from these facilities combined is 573 m³, as outlined in Table 4-15. The resulting decrease to the estimate for three (3) years of closure is \$82.

MP-04 MP-04a MS-HWB-07 **MP-03** Year Total Discharged (m³) 2021 983 294 159 336 2020 1766.5 17 13 2019 1551 186 755 2018 1808 668 2017 1066 580.7 386.6 187.2 2016 662.1 650 2015 69.6 70 204 2014 154 617.1 573 Average

Table 4-15: Discharge Volumes for Additional Water Treatment

4.3.2.8 Supervision, Project Management and Contract Administration

The 2022 Estimate includes a project supervision, management, and contract administration indirect cost allowance of \$367,216 or 9.4% of total direct costs, contaminated soil treatment costs and care and maintenance costs, and closure monitoring/reporting costs. Project supervision, management and contract administration indirect costs include, but are not limited to:

- Contract strategy, administration and expediting.
- Construction logistics, planning, scheduling, supervision, and manpower forecasts.
- Labour relations, safety.
- Field office management, temporary facilities.
- Materials receiving and warehousing.
- Progress monitoring, trending, and reporting.
- Cost performance monitoring, trending, and claims processing; and
- Quality assurance.

4.3.2.9 Engineering Fees

The 2022 Estimate includes an engineering, design and execution planning indirect cost allowance of \$142,022 or 3.9% of the total direct costs.

4.3.2.10Contingency

The 2022 Estimate includes an additional contingency of \$781,311 or 20% of the total of direct costs, contaminated soil treatment costs, care and maintenance and closure and post closure monitoring costs.

4.3.3 Exclusions

The listed activities below are recognized by Baffinland as being required to be conducted in an unforeseen closure and reclamation scenario, but additional costs have not been included in the 2022 Work Plan Security Estimate on the basis that it is Baffinland's position that the 2022 Work Plan activities do not warrant additional cost allocations for these activities. Excluded activities from the 2022 Work Plan Security Estimate are:

- Explosives (Ammonium Nitrate) the allocation for explosives is sufficient based on the scope of the 2022 Work Plan.
- Off-Site Disposal of Hazardous and Non-Hazardous Waste the allocation for off-Site disposal is sufficient based on the scope of the 2022 Work Plan.

4.3.4 Inflation

As a result of the Arbitration, Baffinland was directed to apply inflation in years when unit rate costs have not been updated. In order to calculate the rate of inflation to be applied in a given year, Baffinland utilizes the Consumer Price Index (CPI) for Iqaluit (not seasonally adjusted) for the month of September in a given year. September was selected to maintain consistency in the approach to the inflation calculation between years, as it is the month that will be last published prior to the Work Plan issuance and ASR kickoff on November 1st of a given year. The Inflation multiplier is calculated as follows;

$$Inflation \ Adjustment \ multiplier \\ = \frac{(Inflation \ reading \ for \ current \ year) - (Base \ year \ for \ inflation \ adjustment)}{(Base \ year \ for \ inflation \ adjustment)}$$

Inflation is calculated relative to the last year in which in a unit rate update was completed. For the 2022 Estimate, the base year for inflation adjustment is 2018 (the year in which unit rates were last updated), and the current year is 2021 (the year in which the 2022 Estimate was prepared).

Table 4-16: Inflation Calculation – 2021 Estimate

Inflation Multiplier Parameters	CPI Reading (September)
Base year from which Statistics Canada measures inflation (2002)	100
Base year for which the inflation adjustment is taken (2018 Unit Rate Update)	129.5
Current year of mining operations (2020)	133.7
Inflation Adjustment multiplier	1.032

As a result, the total inflation adjustment represents an increase of \$ 141,252 based on a total cost of \$4,355,281 for the 2022 Estimate. Based on this the total value for the 2022 Estimate is \$4,496,533.

5 2022 ESTIMATE SUMMARY

The 2022 Estimate is inclusive of all closure and reclamation costs estimated to be required for a 3rd Party Contractor to perform the work in a 'worst-case' scenario for all disturbed areas, project components and project activities existing on the Mary River Project site upon conclusion of the 2022 Work Plan, including legacy exploration phase liabilities.

Baffinland has prepared Table 5-1 which is a summary of the estimate for the 2022 Work Plan and 2021 Work Plan Reconciliation ("2022-R" and "2022").

As mentioned in Section 3, Baffinland presented the 2021 Work Plan Addendum for the Mary River Project in June 2021, with a revision to securities for the 2021 Work Plan Addendum divided into two (2) tranches. The total marginal reduction in reclamation security was \$17,595,771, with the following breakdown per tranches:

- Tranche 1 Marginal reduction in reclamation security of \$16,099,200.
- Tranche 2 Marginal reduction in reclamation security of \$1,496,571.

Table 5-2 presents the 'global' closure and reclamation security estimated to be required based on the Global Estimate from 2021 Work Plan (Column C) compiled with the adjustment based on the 2021 Work Plan Addendum (Column D and E) and the 2022 Marginal Estimate including 2021 Reconciliation (Column F), compared to the amount already posted (Column G).

Table 5-1: Summary of 2022 Work Plan Marginal Increase with 2021 Reconciliation

Component	Marginal Increase to Global Estimate	Inuit Owned Land Allocation	Crown Land Allocation	Water Allocation	Land Allocation
DIRECT COST SUB-TOTAL	\$3,641,590	\$3,639,652	\$1,937	-	\$3,641,590
