Subject: Projected Water Use at Milne in 2014 if Early Revenue Construction is approved

To: Sean Joseph <sjoseph@nunavutwaterboard.org>Cc: Erik Madsen <erik.madsen@baffinland.com>, Jim Millard <jim.millard@baffinland.com>, "Phyllis Beaulieu (phyllis.beaulieu@nwb-oen.ca)" <phyllis.beaulieu@nwb-oen.ca>

Hi Sean,

To follow up with our conversation yesterday, I am providing you with a graph showing a projected conservative estimate on our water use this year at Milne Port (see below in body of this email). As discussed, we are only submitting these preliminary numbers to you for your information and context. Once the NWB determines what the best permitting path is, Baffinland will provide the final revised water consumption numbers with applicable back up information. There are several assumptions and estimations that have been used to arrive at this conservative estimate, and Baffinland will update the ERP once the ERP is approved.

Of note is the fact that this is a projected temporary use that would be above the Type A allowance for only a 4 month period. Also, please note that these are monthly averages of daily use. This average. Also of note is the fact that this conservative estimate would still have Baffinland well below the daily allowance in the Type A of approx. 1600m3 per day due to the fact that development is occurring as yet and that the Mine Site is below what was anticipated during construction of the rail project. At Milne, we estimate that we will be below the daily maximum for the remaining activities, the daily maximum in the Type A will likely not be adequate, even though we are well below what is allowed over all in the Type A.

Please let me know if you have any questions on this Sean. I can speak with you today or on Monday if required.

Regards,

Oliver
