Re: Historical Ash Deliverables
Mary River Project – Water Licence No. 2AM-MRY1325

Dear Mr Millard:

This letter is a follow-up to a phone conversation held with Allan Knight, Environmental Superintendent at Baffinland Iron Mines Corporation (BIMC), on January 30th, 2015.

AANDC Water Inspections recognizes that due to certain constraints additional time is required to complete the report as required under the *Historical Ash Disposal Management Plan* and that this report will be submitted on February 2nd, 2015. Within this report Baffinland committed to include:

- Summary of the finding of the soil monitoring program
- Summary of the completion of the Disposal Plan for the Waste Ash in Barrels

Sincerely,

Justin Hack
