**RE: Modification Request No. 3b – Milne Port 380-Person Camp  
Mary River Project, Type 'A' Water Licence - 2AM-MRY1325 - Amend. No. 1**

Baffinland Iron Mines Corporation (Baffinland) provides this letter to the Nunavut Water Board (NWB) in response to the comment received on Modification Request No. 3b from the Qikiqtani Inuit Association (QIA)<sup>1</sup>.

Baffinland has provided the design review completed by a third party consultant (Banner Environmental Engineering Consultants Ltd.) in Attachment 8 of the 10 December 2018 submission, signed and stamped by an engineer registered in Nunavut. In their review, Banner Environmental evaluated the designs for the piping and instrumentation, general arrangement, control narrative, operation manual and historical operation were reviewed, and it was determined that the design is suitable and should meet or exceed the wastewater treatment requirements for the Project. Baffinland believes this documentation is sufficient for intervenors to evaluate the design and efficacy of the wastewater treatment system.

We trust that this response provides sufficient clarification. Please do not hesitate to contact the undersigned should you have any remaining questions or comments.

Regards,

A handwritten signature in black ink, appearing to read "Chris Murray", written over a circular stamp or seal.

Christopher Murray  
Environmental & Regulatory Compliance Manager
