Table 3-2: Monitoring Parameters

Group	Parameters
1	pH, turbidity, hardness, alkalinity, ammonia nitrogen, total metals (aluminum, arsenic, barium, cadmium, chloride, chromium, copper, fluoride, iron, lead, manganese, mercury, molybdenum, nickel, nitrite, nitrate, selenium, silver, thallium, zinc), sulphate, total dissolved solids (TDS), TSS, total cyanide. If CN total is detect in an analysis result; further analysis of CN Free and CN WAD will be trigger.
2	**Total and Dissolved metals**: aluminum, antimony, arsenic, boron, barium, beryllium, cadmium, copper, chromium, iron, lithium, manganese, mercury, molybdenum, nickel, lead, selenium, tin, strontium, titanium, thallium, uranium, vanadium and zinc **Nutrients**: Ammonia-nitrogen, total kjeldahl nitrogen, nitrate nitrogen, nitrite-nitrogen, ortho-phosphate, total phosphorous, total organic carbon, total dissolved organic carbon and reactive silica; **Conventional Parameters**: bicarbonate alkalinity, chloride, carbonate alkalinity, conductivity, hardness, calcium, potassium, magnesium, sodium, sulphate, pH, total alkalinity, TDS, and TSS, turbidity; Total cyanide and free cyanide. If CN total is detect above 0.05 mg/L in an analysis result for monitoring station in receiving environment; further analysis of CN WAD will be trigger.
3	MMER parameters (total cyanide, arsenic, copper, lead, nickel, zinc, radium 226, total suspended solids, pH), sulphate, turbidity and total aluminum.
4	Total Arsenic, Total Copper, Total Lead, Total Nickel, TSS, Benzene, Toluene, Ethylbenzene, Xylene, TPH, pH
MMER	Total cyanide, arsenic, copper, lead, nickel, zinc, radium 226, total suspended solids, pH, effluent volumes and flow rate of discharge, acute toxicity (Rainbow Trout and Daphnia magna) and environmental effects monitoring (EEM).

DIKE CONSTRUCTION MONITORING
ᐃᒪᖏᑎ ᑲᑎᖅᓯᐃᓴᖕᓇᖏᑦᖁᐅᓕᖏᑲᑦᑐᖏᖅ

- Adaptive Management Strategy for Dike Construction
  - If monitoring results exceed license limits and TSS triggers at monitoring stations.

  Mitigation:
  1. Slow down or alter construction practices;
  2. Increase monitoring frequency;
  3. Install additional turbidity curtains;
  4. Pumping in trench and treating water; and
  5. Stop dike construction.

In summary:

- Geochemistry samples of waste rock follow the ARD/ML plan and follow Meadowbank standards:
  - Encounter: greywacke, mafic volcanic, intermediate intrusive
  - Generally, sampling every 4th drill hole for ARD; every 16th hole for ML
  - Sent to Meadowbank Lab for ABA and NPR testing; duplicate's sent to external accredited laboratory
- Monthly site wide water quality data collection by technicians follows rigorous QA/QC
  - Qualified technicians
  - Generally 1 field duplicate per 10 samples
  - Sampled by inspectors (INAC, KivIA)
  - Third party accredited laboratory

QUALITY ASSURANCE/ QUALITY CONTROL
ᖃᒃᓄᐃᖅᓂᐅᕕᒃᐊᓗᐊᖅᓱᓂᖅ/ᖃᒃᓄᐃᖅᓂᕆᒃᐊᐅᓪᓕᓂᖅ

In summary:

- EEM/MMER sampling follows ECCC Schedule II regulations
  - ECCC guidance on QA/QC
- Receiving water quality samples during Core Receiving Environmental Monitoring Plan (CREMP) are collected, data is analyzed and reports are produced by a third party consultant.
  - Specific QA/QC and Standard Operating Procedure (SOP) including field duplicates and blanks
  - Samples analyzed be a third party accredited laboratory
- Ground water monitoring and Air quality monitoring
  - SOP
  - Specific QA/QC
  - Samples analyzed be a third party accredited laboratory

HIGHLY TRAINED EMERGENCY AND RESPONSE TEAM (ERT)
ᐊᓯᕈᖏᓂᖅᓴᖅᑕᐅᓕᕆᑎᐊᖅᑐᑐᐊᕕᓇᖅᑐᓕᕐᓗᓂᐊᓚᓗ ᐅᓪᓗᐊᓯᓂ (ERT)

- Designated Emergency Response Team (ERT) consisting of on-site personnel has been established at Meadowbank and another team will be established at Whale Tail
- All members of the teams are trained and familiar with emergency and spill response resources, including their location and access, the SCP, and appropriate emergency spill response methodologies
- The following training is included:
  - A review of the spill response plan and responsibilities of the ERT members;
  - The nature, status, and location of fuel and chemical storage facilities;
  - The on-site and off-site spill response equipment and how to use it;
  - Emergency contact lists;
  - Desktop exercises of “worst case” scenarios; and
  - The likely causes and possible effects of spills.

WHALE TAIL PIT CLOSURE PLANNING
WHALE TAIL ᓄᓇᒥᑦᐃᓗᑦᑐᖅᓯᒪᔨᖅ ᐅᖅᑯᐊᖅᑕᓪᓕᐊᓂᑦᑐᓴᓂᖅ

- After 4 years of mining at Whale Tail Pit , beginning in late 2022 and continuing until 2025, both sites will actively close
- Meadowbank Mine site Interim Closure and Reclamation Plan approach is unchanged
- Progressive closure of Vault Pit and portions of Meadowbank site during operations of Whale Tail Pit
- Refer to the Meadowbank Interim Closure and Reclamation Plan (January 2014)
  - Bonding and Securities set according to Type A License 2AM MEA1525
- To support the Whale Tail Pit Type A License refer to the Whale Tail Interim Closure and Reclamation Plan
  - Closure of the Whale Tail Pit site
  - Closure of the Whale Tail Haul Road
- INAC guidance on closure and reclamation will be adhered to.
