

Final Hearing – September
2017
የህግ ምክር ቤት ጋራ ምክር ቤት
ጥቅምት 2017

- Linkage to Meadowbank Mine
 - Whale Tail Pit requires continuing use of the Meadowbank Tailings Storage Facility
 - No significant change

- Submitted a stand-alone Tailings Management Plan to NWB on January 25th, 2017.

- As a NWB condition, Tailings Management Plan will be updated prior to operation of the Whale Tail Pit.

An aerial photograph showing a large, irregularly shaped reservoir or lake. The water is a dark, murky green color. The reservoir is surrounded by a network of roads and embankments, suggesting it is a managed water body. The surrounding landscape is mostly flat and appears to be a mix of agricultural land and natural vegetation. The sky is clear and blue.

Surface Water Management

➤ **Objective:** to minimize the potential impact of the project on the receiving water surrounding the proposed mining activities

➤ **Strategies:**

1. Reduce the amount of contact water requiring management, pumping, monitoring and treatment
2. Divert non-contact water away from the mine site
3. Limit freshwater quantity requirements

➤ **၎င်းတို့သည်** သံသရာဝတ်စုံများဖြစ်သည်။

- Continued Annual reporting by March 31
- Review the thermal behavior of the Waste Rock Storage Facility cover at Meadowbank and perform thermal modelling (INAC-TRC#8)
- Quality of the water for dust suppression confirmed during monthly monitoring (ECCC-21)
- Adapt closure monitoring to align with annual Core Receiving Environment Monitoring Plan (ECCC-22)
- Geotechnical Engineer's Inspection Report, all reports and performance evaluations prepared by Independent Geotechnical Expert Review Panel
- Generally include existing Meadowbank reporting
