## Outline

- Roles and Responsibilities
- Contributions to the Water Licence Review
- Topics discussed:
  - I. Delayed Waste Rock Storage Facility Interflow Seepage
  - II. Waste Rock Storage Facility Closure Design
  - III. Adaptive Management
- Conclusion

የወረቀት ማስገባትና ማስወገድ

### Comment

Multiple uncertainties with the  
potential to affect the long-term  
performance of the WRSF.

### Recommendation

- Current WRSF cover designs be approved in concept only.
- AEM is to finalize the WRSF cover designs by incorporating all monitoring data and additional thermal and seepage modelling results prior to full closure.

### Status

Resolved

## Conclusion

CIRNAC will continue to work through the water licence application review process with the aim of protecting Nunavut's inland water resources while promoting sustainable development.
