Good morning all,

Please find attached a map of the spill location for the 4m3 grease spill which occurred on Feb.3rd at the Whale Tail Project. I have also included the current action plan for managing this spill on site. Please keep in mind that this is currently a working document and plans may change based on the success of our reclamation efforts.

In response to the disposal of the grease we will NOT be using the MBK landfarm as previously stated. Due to the quantity of grease and a need to mitigating wildlife attraction the grease will be disposed of at the MBK Tailing facility South Cell (see red star on attached map for disposal location)

Additional information and photos will be included in the Spill Follow Up report.

If you have any questions or concerns please do not hesitate to email: meadowbank.environmentsupervisors@agnicoeagle.com or call 819-759-3555 X 4606744

Subject: [EXTERNAL] RE: Reportable Spill at Whale Tail Pit Project - 2022-02-03_4 m3_Grease

CAUTION: EXTERNAL

Hi Rowan,

Thank you for taking time this morning to speak to me about the incident. I understand from our call that the location is difficult to access. Could you please confirm the location with a map? I am wondering about the disposal location, I am not familiar with the approval to dump food waste into the land farm. My immediate concern is that it will become a wildlife attractant. Where is the grease normally disposed of? My understand is in the past the tailing facility was used as an alternative disposal.

Please let me know your thoughts.

Regards,

Christine Wilson, EP

Subject: Reportable Spill at Whale Tail Pit Project - 2022-02-03_4 m3_Grease

Good day,

Attached is a spill report depicting an event, Grease spill, which took place on February 3, 2022 at Agnico Eagle Mines Ltd., Whale Tail Pit Project.

This report is being reported as required by the conditions under the Nunavut Water Board License 2AM-WTP1830, Part H, item 8 (b) pursuant to subsection 12(3) of the Nunavut Waters and Nunavut Surface Rights Tribunal Act.

This report is also being reported as required by the Government of Nunavut's, Environmental Protection Act paragraph 5.1(a).

The spill occurred on IOL. A follow up report will be submitted following the completion of the corrective actions as required by Nunavut Water Board License 2AM-WTP1830, Part H, item 8 (c).

If you require further information or have questions, please do not hesitate to contact the undersigned.
