Re: 2BB-BOS1727 Notification of Discharge from Containment Facilities BOS-2, BOS-5, BOS-6, BOS-9

As per Part D, Item 23 of the Type B Water License 2BB-1727, TMAC Resources Inc. is providing written notification to the Inspector prior to the anticipated discharge of accumulated water from the containment facilities located at the Boston Advanced Exploration Project site.

Table 1. Containment Facility Estimated Discharge Volumes and Locations

SNP Monitoring Station	Estimated Discharge Volume (m³)	Discharge Location (UTM Nad 83)
BOS-2	75	Tundra immediately east of BOS-2
BOS-5	100	Tundra immediately east of BOS-5
BOS-6	10	Tundra immediately to the west of landfarm
BOS-9	600	Tundra immediately west of portal

Water will only be discharged to the tundra upon receipt of analytical results that comply with the water quality criteria outlined within the water license. Effluent that does not meet the discharge criteria limits under Part D, Item 6 will be directed to the Doris North's TIA.

Discharge volumes and analytical results for each monitoring station will be provided in the monthly monitoring reports.

If you have any questions or require clarification on any of the information provided, please contact me.

Regards,
