Subject: Monthly Reports for Madrid Type B Water Licence 2BB-MAE1727

Eva

As you know the NWB granted the abovementioned licence on May 23. Part J, Item 19 of the licence requires that a monthly report be submitted. As you know TMAC is not planning to commence any operations at either of the Madrid sites until the fall of 2018. So for the interim time we would like to suggest the following:

* No report for the month of May 2017 - There were only eight days in May after the issuance of the licence, ground was frozen and no work occurred at any relevant sites.

* No report for the month of June 2017 - There was no work ongoing at the relevant sites.

* A report will be submitted for July 2017 - As no work will have been conducted the report will outline the template to be used for regular monthly reporting, including the coordinates of lake sampling stations to be included in the sampling program and the analytical results of sampling carried out in lakes.

* A report will be submitted monthly thereafter.

Please let me know if this is acceptable.

Regards
John
